1. Attached are two tables containing the data requested by Bob Michaels, Senior Staff Member, Defense Subcommittee, House Appropriations Committee, on the composition of miscellaneous general cargoes imported by sea into North Vietnam in 1965 and on exports by North Vietnam to selected countries of the Free World for the first helf of 1964 and first helf of 1965.

Che l'ille lieur dr 1900 mil l'ille mil or 1909.

3. Data are insufficient for a valid estimate of North Vietnom's excorts to the Free World in 1965. We have therefore provided data in Table 13, which is unclassified, on exports during the first half of 1964 and the first half of 1965 on North Vistaga's exports to France, best Cormany, Japan, Meloya, and Hong Kong. These countries accounted for more than 30 percent of North Victora's exports to the Free World in both years. The data show that North Vietnam's exports to these countries in the first half of 1965 exceeded those of the first half of 1964. Shipping data, however, indicate that North Vietnea's exports to the free World in the second helf of 1965 were about 36 percent loss then in the first half of 1965. Specifically the volume of coal errorts to Free World countries decreased by 23 percent, cement exports by 53 percent, ply iron by 52 percent, and all other exports by 59 percent. Because these exports to the Free World provide the only significant source of foreign exchange for North Vietnem, the phery decrease in exports to the Free World in the second half of 1965 represent a considerable loss to the economy of North Vietnam.

Note on Table 13 - North Vietnam Exports to Selected Free World Countries, January-June 1964 and 1965

The data in Table 13 indicate that North Vietnam's exports to all Free World countries in the second half of 1965 exceeded those of the first half of 1964. Shipping data, however, indicate that North Vietnam's exports to the Free World in the second half of 1965 were about 36 percent less than in the first half of 1965. Specifically the volume of coal exports to Free World countries decreased by 28 percent, cement exports by 58 percent, pig iron by 54 percent, and all other exports by 59 percent. Because these exports to the Free World provide the only significant source of foreign exchange for North Vietnam, the sharp decrease in exports to the Free World in the second half of 1965 represent a considerable loss to the economy of North Vietnam.

	On 11 February I advised the DD/I (memorandum attached) of certain follow-up support to the Defense Subcommittee of the House Appropriations Committee which stemmed from the Director's presentation on 21 January. The attached packet completes this action. I don't believe it is sufficiently important to call to Jack's attention, but I wanted your records to be complete.
